Training Center

PROFESSIONAL CERTIFICATION

ETABS Training

The ETABS Course teaches building analysis and design software. Participants learn modeling load application and seismic analysis. Training includes concrete and steel design code checks and detailing for multi-story structures in structural engineering practice.

ABOUT US

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

- Industry recognized certifications
- Convenient location in the heart of Dubai
- Affordable fees with multiple payment plans
- Lifetime post-training support

Our Features

- Hands-on learning with real-world projects
- Expert trainers with industry experience
- Flexible learning options to fit your schedule
- State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

COURSE OVERVIEW

ETABS Course

It is the tool to learn building design with ETABS software.

ORBIT Training Center

Course Description

This course covers ETABS for structural analysis of buildings. Master 3D modeling dynamic analysis and code-based design. Projects focus on high-rise structures foundation design and performance evaluation for earthquake-resistant buildings in civil engineering.

Key Outcomes

- Master ETABS interface.
- Create building models.
- Apply dynamic loads.
- Perform seismic analysis.
- Design concrete frames.
- Analyze shear walls.
- Generate construction docs.

Duration

35-45

Hours of Training

Format

Classroom / Online

Flexible Option

Target Audience

- Structure Designers in buildings.
- Concrete Industry pros.
- Become Structure Engineer.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic structural knowledge needed.
- Computer with ETABS installed.
- Interest in seismic design.

COURSE OVERVIEW

ETABS Course

ORBIT Training Center

Start with ETABS fundamentals and building modeling.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Perameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
35 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
40 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Perameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
45 Hrs

MODULES

Training Center

ETABS Course

Start with ETABS fundamentals and building modeling.

01 Exploring ETABS Interface & Workspace Setup

- Customize toolbars ribbon display and shortcut keys
- Configure units preferences and decimal precision controls
- Master model explorer tables and selection tools
- Define drawing grids snap settings and coordinates
- Create reusable project templates with standard settings

02 Reference Import Grid System and Story Data Setup

- Import scale DWG DXF PDF drawings accurately
- Establish master grid lines and rotated systems
- Define story heights plinth levels and podiums
- Assign diaphragm constraints at initial story setup
- Align geometry and lock reference planes precisely

03 Material Properties Section Definitions and Code Setup

- Define concrete steel rebar and prestressing materials
- Specify code-based strength modulus and coefficients
- Create frame wall slab and tendon sections
- Import edit international steel shape databases
- Assign design codes factors and response modifiers

04 Frame Element Modeling Columns Beams and Bracing

- Draw edit frames using snap and coordinate input
- Assign sections materials releases and end offsets
- Apply cardinal points insertion and joint offsets
- Model inclined haunched and eccentric bracing members
- Use replicate mirror array for framing efficiency

05 Slab Floor System Modeling with Diaphragm Assignment

- Generate area objects for various slab systems
- Assign shell thickness and design strip properties
- Define rigid semi-rigid flexible diaphragm behaviors
- Model drops capitals openings and thickened zones
- Apply controlled auto-mesh with refinement options

06 Shear Wall Core Wall and Lateral System Modeling

- Draw walls and assign pier spandrel labels
- Specify shell-thick layered or equivalent properties
- Model coupling beams with frame or shell behavior
- Define boundary zones and special seismic detailing
- Control mesh size for accurate force distribution

MODULES

ETABS Course

Start with ETABS fundamentals and building modeling.

07 Advanced Geometry Modeling for Complex Structures

- Model transfer girders outriggers and belt trusses
- Create irregular setbacks stepped and podium floors
- Implement link gap damper and isolator elements
- Apply joint body and equation constraints
- Set staged construction with time-dependent modifiers

08 Comprehensive Load Patterns and Assignment Methods

- Define dead live partition snow and cladding loads
- Assign frame area point line and surface loads
- Include temperature shrinkage creep and settlement cases
- Generate auto wind seismic loads per code
- Verify load summation equilibrium and mass source

09 Seismic Parameters Response Spectrum and Modal Analysis

- Define site class spectral parameters and design category
- Create code-based or user-defined spectrum functions
- Set mass participation and orthogonal combination rules
- Perform eigenvalue analysis and review mode shapes
- Apply scaling base shear correction and torsion

10 Wind Load Auto-Generation and Manual Pressure Methods

- Configure directional envelope or user-defined wind cases
- Specify exposure topography and gust-effect factors
- Apply pressures on diaphragms and vertical elements
- Model torsional irregularity with eccentric application
- Verify base shear overturning and equilibrium checks

11 Load Combinations and Nonlinear Effects and Analysis Control

- Generate strength serviceability and seismic combinations
- Include P-Delta large displacement and cracked modifiers
- Configure nonlinear static time-history pushover cases
- Set iteration limits convergence and solution controls
- Execute batch analysis with error monitoring

12 Analysis Results Interpretation and Model Validation

- Display drifts displacements accelerations and shears
- Review reactions equilibrium errors and participation ratios
- Evaluate mode shapes periods and force diagrams
- Identify soft story torsional and modeling issues
- Cross-check results with tables and manual verification

MODULES

Training Center

ETABS Course

Start with ETABS fundamentals and building modeling.

13 Reinforced Concrete Frame Design and Detailing

- Set preferences overwrites and design combinations
- Perform beam column brace design per code
- Review flexural shear axial and interaction ratios
- Detail longitudinal bars stirrups and confinement
- Generate rebar tables and export detailing data

14 Shear Wall Coupling Beam and Slab Design

- Assign piers and run wall flexure shear checks
- Detail boundary reinforcement and confinement zones
- Design slabs for punching shear deflection control
- Generate reinforcement contours and strip-based rebar
- Check serviceability and long-term deflection limits

15 Steel Frame and Composite Member Design Checks

- Configure code preferences and load combinations
- Perform beam column brace truss capacity checks
- Evaluate buckling lateral-torsional and unity ratios
- Design composite beams with deck concrete topping
- Generate connection forces and member summaries

16 Design Optimization Iteration and Reporting Tools

- Optimize sections using iterative analysis runs
- Apply stiffness modifiers for cracked behavior
- Generate detailed design tables and graphical reports
- Export rebar schedules forces and detailing extracts
- Prepare input summary assumptions and documentation

Final Projects and Assement:

- **Assessment**: Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

ORBIT Training Center

Muppuli Raja

★★★★★

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Ranjan Axalan

★★★★★

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Arun

★★★★★

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skiils

Numan

★★★★★

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Harshu CH

★★★★★

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff…

Lelanie Fernandez

★★★★★

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

★★★★★

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

★★★★★

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

★★★★★

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

★★★★★

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
