

About Us

Orbit Training was established in 2023 with the aim of bridging the gap between academic learning and real-world skills. We identified a shortage of hands-on, project-based vocational training programs in Dubai and the wider UAE market. Our founder, had over 15 years of experience in the education industry and saw an opportunity to provide an alternative learning pathway focused on practical skills development.

Word of mouth led to rapid growth and we soon outgrew our initial premises. Today, Orbit Training is a leading private vocational education provider offering over 90+ certificate programs. We have trained over 400 students from more than 20 nationalities. Our expert trainers hold professional qualifications and have extensive experience working with top companies. Many also take on freelance consulting projects to stay at the forefront of industry trends.

We have received commendations from Dubai SME and the Knowledge and Human Development Authority. The quality of our instructors and focus on experiential learning has also earned us an average student satisfaction score of 4.9 out of 5.
