

PROFESSIONAL CERTIFICATION

3DS Max (Modelling and Rendering) Training

The 3DS Max Course covers 3D modeling rendering and animation for architecture and design. Students learn interface navigation polygon modeling texturing lighting and camera setup. Practical training includes creating interior scenes applying materials and producing photorealistic renders to visualize designs effectively for professional presentations and client approvals.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

3DS Max Course

It is a way to learn 3D modeling and rendering with 3DS Max tool.

Course Description

This course provides comprehensive training in Autodesk 3DS Max for visualization professionals. Master modeling texturing lighting and rendering techniques for architectural and product visuals. Hands-on projects focus on creating detailed scenes animations and VR content for industry applications in design media and entertainment.

Duration

40-50

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master 3DS Max interface.
- ✓ Create polygon models.
- ✓ Apply advanced textures.
- ✓ Set up lighting scenes.
- ✓ Produce photoreal renders.
- ✓ Animate design elements.
- ✓ Enhance visual presentations.

Target Audience

- Architecture for 3D visuals.
- Interior Designers rendering.
- Draftsmen in modeling.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic computer knowledge needed.
- Interest in 3D design.
- Access to 3DS Max.

3DS Max Course

Begin with 3DS Max basics and modeling techniques.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
40 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
45 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
50 Hrs

3DS Max Course

Begin with 3DS Max basics and modeling techniques.

01 Exploring the 3ds Max Interface & Configuration

- > Customize viewports navigation controls and display drivers for accuracy
- > Set up toolbars quad menus ribbon and hotkey mapping for speed
- > Configure scene units system scale grid and snapping preferences
- > Organize scene explorer layer manager and selection/filter tools
- > Establish standardized project templates and folder structures

02 Importing and Preparing Reference Data for Modeling

- > Import DWG DXF PDF and image underlays with correct scaling
- > Align and calibrate multiple reference drawings accurately
- > Set up background images and viewport background locking
- > Create measurement helpers and tape objects for verification
- > Prepare clean base planes and grid systems from plans

03 Precision Wall Floor and Ceiling Modeling

- > Build multi-segment parametric walls with correct thickness
- > Create accurate floor slabs raised floors and ceiling systems
- > Model complex wall junctions corners and reveals cleanly
- > Apply consistent material IDs during base geometry creation
- > Use slice cut and pro-boolean for precise openings

04 Professional Door Window and Opening Systems Modeling

- > Construct parametric or custom door/window families
- > Model detailed frames sashes glazing and hardware
- > Create curtain wall systems with mullions and panels
- > Build arch-top sliding and pivot-style openings
- > Apply array and clone techniques for repetitive fenestration

05 Spline-Based Modeling for Trims Moldings and Profiles

- > Draw and refine complex closed and open spline profiles
- > Apply extrude bevel shell sweep and lathe modifiers
- > Create detailed baseboards crown molding and picture rails
- > Build handrails balustrades and curved stair elements
- > Edit tangent handles and vertex types for smooth curvature

06 Advanced Polygonal Modeling Core Techniques

- > Convert geometry to editable poly with clean topology
- > Master extrude inset chamfer bridge connect and cut tools
- > Use graphite modeling ribbon for fast professional edits
- > Apply symmetry slice plane and mirror for symmetrical parts
- > Weld target weld remove and optimize vertices/edges

3DS Max Course

Begin with 3DS Max basics and modeling techniques.

07 Staircase Ramp and Circulation Element Modeling

- > Build straight U-shaped L-shaped and spiral staircases
- > Model detailed treads risers stringers and nosings
- > Create custom handrails balusters and newel posts
- > Construct accessible ramps and landings with correct slopes
- > Use array path deform and loft for complex configurations

08 Furniture and Custom Joinery Modeling â€œ Part 1

- > Model modular seating: sofas armchairs benches ottomans
- > Construct dining and coffee tables with realistic proportions
- > Build cabinet carcasses drawers and shelving systems
- > Detail doors handles hinges and soft-close mechanisms
- > Create kitchen islands countertops and breakfast bars

09 Furniture and Custom Joinery Modeling â€œ Part 2

- > Model wardrobes built-in storage and display units
- > Create beds headboards and upholstered elements
- > Build office furniture: desks credenzas and shelving
- > Detail fabric cushions tufting stitching and piping
- > Develop instanced modular libraries for rapid scene population

10 Hard-Surface Detailing and Accessory Modeling

- > Model precise lighting fixtures chandeliers and sconces
- > Create sanitaryware: basins toilets bathtubs showers
- > Build mirrors glass partitions railings and balustrades
- > Detail decorative elements: vases sculptures artwork frames
- > Add realistic edge fillets chamfers and subtle imperfections

11 Ceiling Features Cladding and Facade Detailing

- > Model suspended ceilings coffers beams and bulkheads
- > Create wall paneling wainscoting and acoustic panels
- > Build exterior cladding systems louvers and sunshades
- > Detail textured surfaces: brick stone tile wood slats
- > Apply displacement and normal mapping preparation

12 UV Unwrapping and Texture Projection Mastery

- > Perform professional UV unwrapping with peel and relax tools
- > Use multi-map types: planar box cylindrical face pelt
- > Edit UV islands pack efficiently and eliminate stretching
- > Create multiple UV channels for base detail dirt and AO
- > Align textures to architectural grain and orientation

3DS Max Course

Begin with 3DS Max basics and modeling techniques.

13 Building Production-Ready Physically Based Material Library

- > Develop accurate PBR materials: albedo roughness metallic
- > Create high-fidelity presets for wood stone concrete metals
- > Incorporate detailed normal bump displacement and opacity
- > Build layered and composite materials for aged/worn looks
- > Organize material editor slate view and project libraries

14 Photometric Lighting and Daylight System Setup

- > Place IES photometric lights with manufacturer profiles
- > Configure physically accurate sun & sky daylight systems
- > Implement HDRI environment maps for realistic bounce
- > Adjust exposure white balance and light inclusion sets
- > Control shadow quality softness and decay realistically

15 Interior Lighting Strategies and Global Illumination Control

- > Combine direct portal and indirect illumination sources
- > Optimize GI settings: bounces sampling denoising quality
- > Use light groups for independent control and testing
- > Achieve accurate color bleeding caustics and light leaks
- > Balance warm/cool artificial lights with natural daylight

16 Physical Camera Setup Perspective Correction and Composition

- > Configure physical cameras with real lens data and shift
- > Apply two-point perspective correction and lens effects
- > Set accurate focal lengths f-stops and depth of field
- > Compose shots using architectural framing principles
- > Create multiple named camera views for different spaces

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
