

PROFESSIONAL CERTIFICATION

AutoCAD 2D & 3D Training

This course is an introduction to AutoCAD for creating 2D and 3D drawings. Learn to draw floor plans sections elevations and details professionally. Ideal for interior designers structure engineers and others interested in design. Become a draftsman with practical training. Gain skills to review and work in design field. The program covers essential tools and techniques for accuracy.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

AutoCAD 2D & 3D Course

Learn AutoCAD 2D and 3D for drafting in design and engineering.

Course Description

This course offers training in AutoCAD for 2D and 3D professional drawings. Learn floor plans sections elevations and details. For those starting in design become a skilled draftsman. Hands on sessions build expertise. Understand standards for reviewing work. Suitable for engineering professionals.

Duration

30-40

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Learn floor plan creation
- ✓ Master section views
- ✓ Create elevation drawings
- ✓ Detail drawings skills
- ✓ Professional drafting program
- ✓ Become skilled draftsman
- ✓ Start as designer

Target Audience

- Aspiring draftsmen in architecture field
- Interior designers wanting CAD skills
- Structure engineers entering drafting

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic computer usage knowledge
- Interest in technical drawing
- No prior CAD software needed

AutoCAD 2D & 3D Course

Begin with AutoCAD interface and basic drafting tools.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
30 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
35 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
40 Hrs

AutoCAD 2D & 3D Course

Begin with AutoCAD interface and basic drafting tools.

01 Introduction to the AutoCAD User Interface

- > Exploring ribbon and toolbar navigation features
- > Customizing workspaces and quick access toolbars
- > Mastering command line operations and aliases
- > Configuring drawing units and scale factors
- > Utilizing help resources and command references

02 Basic Drawing Commands for 2D Elements

- > Creating lines polylines and splines precisely
- > Drawing circles arcs and ellipses accurately
- > Using rectangles polygons and various shapes
- > Applying offset fillet and chamfer tools
- > Adding construction lines rays and multilines

03 Editing and Modifying Objects Effectively

- > Selection using filters and quick select methods
- > Executing trim extend break and join commands
- > Applying mirror rotate scale and stretch operations
- > Utilizing array patterns and multiple copy techniques
- > Managing undo redo and purge operations efficiently

04 Layers and Object Properties Management

- > Establishing layer hierarchies and naming standards
- > Assigning colors linetypes and lineweights appropriately
- > Controlling visibility freezing and locking layers
- > Implementing layer states and reconciliation processes
- > Matching and transferring properties between objects

05 Precision Drawing Tools for Accuracy

- > Enabling object snaps and dynamic UCS
- > Activating polar tracking and ortho modes
- > Performing grip-based editing for quick modifications
- > Setting up dynamic input and tooltip features
- > Conducting accurate measurements and area calculations

06 Text and Annotations in Drawings

- > Inserting single-line and multiline text objects
- > Defining text styles fonts and justifications
- > Adding leaders multileaders and annotation scales
- > Creating tables with formulas fields and links
- > Editing for alignment masking and spell-checking

AutoCAD 2D & 3D Course

Begin with AutoCAD interface and basic drafting tools.

07 Dimensioning Techniques for Measurements

- > Applying linear aligned and ordinate dimensions
- > Utilizing angular radial and diameter types
- > Customizing dimension styles tolerances and units
- > Modifying overrides and maintaining associativity
- > Generating baseline continued and inspection dimensions

08 Hatching and Gradients for Area Fills

- > Defining hatch patterns and boundary options
- > Applying solid fills and gradient transitions
- > Editing hatch associativity and draw order
- > Handling gaps islands and boundary detection
- > Adjusting scales angles origins and transparency

09 Blocks and Attributes for Reusability

- > Designing static and dynamic blocks with states
- > Defining attributes prompts and default values
- > Editing definitions in the block editor environment
- > Organizing block libraries and design center
- > Extracting attribute data to tables or files

10 Layouts and Viewports for Plotting

- > Setting up paper space layouts and setups
- > Creating and scaling viewports with locking
- > Managing plot styles CTB and STB configurations
- > Adding title blocks borders and revision clouds
- > Transitioning between model and paper spaces

11 External References and Data Linking

- > Attaching and overlaying Xrefs with paths
- > Managing bindings unloading and reloading Xrefs
- > Linking data from external spreadsheets or databases
- > Synchronizing and updating referenced files
- > Clipping boundaries and editing in-place

12 Parametric Constraints for Design Control

- > Implementing geometric constraints like parallel and tangent
- > Establishing dimensional constraints with expressions
- > Editing and deleting constraint parameters flexibly
- > Activating infer constraints during drawing
- > Resolving under- and over-constrained designs

AutoCAD 2D & 3D Course

Begin with AutoCAD interface and basic drafting tools.

13 Advanced 2D Tools and Customization Options

- > Leveraging Express Tools for productivity gains
- > Creating custom linetypes shapes and patterns
- > Recording and playing back macros automatically
- > Integrating fields and parameters in dynamic blocks
- > Optimizing drawing performance through auditing

14 Introduction to 3D Modeling and Automation

- > Navigating 3D workspaces views and orbit controls
- > Generating basic 3D primitives solids and meshes
- > Applying extrude revolve loft and sweep commands
- > Importing and executing AutoLISP routines customly
- > Generating and debugging Lisp code with AI

15 3D Rendering Output and Data Extraction

- > Assigning materials textures and environmental maps
- > Configuring lights shadows and camera perspectives
- > Producing high-quality renders and animations
- > Exporting 3D models to STL or PDF formats
- > Extracting data from drawings to external files

16 Data Extraction Automation and Advanced Output

- > Extract object data and attributes to external tables
- > Create automated reports using data extraction wizards
- > Link Excel spreadsheets for bidirectional data sync
- > Configure batch plotting and publishing workflows
- > Implement scripting for repetitive task automation

Final Projects and Assement:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!
