

PROFESSIONAL CERTIFICATION

Autodesk Dynamo Training

The Autodesk Dynamo Course introduces visual programming for BIM automation in Revit. Participants learn interface navigation geometry creation data management and custom script development. Through hands-on exercises students master node-based workflows Revit integration and parametric design techniques to streamline architectural and engineering

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Autodesk Dynamo Course

It is a way to learn how to use Dynamo for BIM tasks in Revit.

Course Description

This course provides in-depth training on Autodesk Dynamo for BIM professionals. You'll master visual programming create custom nodes automate Revit tasks and integrate data for efficient workflows. Practical projects reinforce concepts enabling real-world application in architectural engineering and construction projects to boost design efficiency.

Duration

30-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master Dynamo interface.
- ✓ Create custom scripts.
- ✓ Automate Revit tasks.
- ✓ Manipulate geometry data.
- ✓ Integrate BIM tools.
- ✓ Optimize design processes.
- ✓ Enhance project efficiency.

Target Audience

- BIM Modellers seeking automation.
- BIM Technicians for tools.
- BIM Coordinators in management.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic Revit knowledge required.
- Basic computer skills needed.
- Interest in programming basics.

Autodesk Dynamo Course

Begin with Dynamo basics and Revit integration.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
30 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
38 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
45 Hrs

Autodesk Dynamo Course

Begin with Dynamo basics and Revit integration.

01 Navigating the Dynamo Interface

- › Installing Dynamo with host application integration
- › Exploring node library categories and search tools
- › Customizing canvas settings for better productivity
- › Understanding graph execution modes and run types
- › Identifying input output ports on every node

02 Constructing Foundational Graphs with Nodes and Connection Strategies

- › Placing and connecting basic math string nodes
- › Using watch nodes for real time inspection
- › Organizing graph layout with groups annotations
- › Implementing code blocks for inline expressions
- › Saving and versioning graphs for team use

03 Handling Data Types Variables and Conversion Workflows

- › Identifying number string boolean color types
- › Converting data types using dedicated nodes
- › Creating variables through code block assignments
- › Applying unit conversions for engineering accuracy
- › Debugging type mismatches across graph structures

04 Mastering List Structures Creation and Hierarchical Management

- › Generating lists with range sequence nodes
- › Applying list lacing for multi input tasks
- › Flattening shifting and chopping list levels
- › Using replication guides for data control
- › Combining partitioning lists for targeted work

05 Implementing Logical Operations Conditionals and Control Flows

- › Building if else statements with conditional nodes
- › Evaluating boolean logic using operator nodes
- › Creating switch structures for decision paths
- › Looping data with iterative graph patterns
- › Handling exceptions and error flows efficiently

06 Creating Two Dimensional Geometric Elements and Curve Components

- › Generating points and coordinate systems numerically
- › Constructing straight lines and circular arcs
- › Developing NURBS curves from control points
- › Creating closed polycurves and polygonal shapes
- › Measuring lengths areas and bounding boxes

Autodesk Dynamo Course

Begin with Dynamo basics and Revit integration.

07 Editing and Transforming Two Dimensional Geometric Features

- > Offsetting curves by specified distances
- > Trimming extending intersecting curve segments
- > Rotating scaling elements with dynamic inputs
- > Joining curves into continuous polycurves
- > Projecting geometries onto target planes

08 Creating Three Dimensional Solids and Surface Models

- > Extruding profiles along straight curved paths
- > Lofting curves to generate smooth surfaces
- > Revolving profiles around defined axes
- > Creating boundary surfaces from edge curves
- > Thickening surfaces into solid volumes

09 Executing Geometry Operations on Three Dimensional Models

- > Performing union difference and intersection
- > Splitting solids using cutting planes
- > Merging surfaces into watertight models
- > Calculating volumes areas and centroids
- > Applying fillets chamfers to solid edges

10 Establishing Parametric Relationships in Geometric Designs

- > Binding geometry to slider input parameters
- > Creating adaptive models with dynamic changes
- > Linking elements through shared parameters
- > Using expressions for parametric variations
- > Testing iterations with real time updates

11 Selecting and Creating Revit Elements with Dynamo

- > Selecting elements by category and parameters
- > Creating walls floors and columns directly
- > Placing family instances at precise locations
- > Retrieving host element geometry references
- > Filtering elements using custom conditions

12 Developing Parametric Revit Families and Content Libraries

- > Building family geometry with reference lines
- > Embedding Dynamo scripts inside families
- > Creating type instance parameters for flexibility
- > Testing family behaviors under variations
- > Exporting families to project libraries

Autodesk Dynamo Course

Begin with Dynamo basics and Revit integration.

13 Building Custom Nodes and Reusable Component Libraries

- > Defining inputs outputs and node descriptions
- > Packaging graphs into shareable libraries
- > Organizing nodes in custom categories
- > Updating versioning nodes for team access
- > Integrating nodes into workflow graphs

14 Incorporating Python Scripting for Enhanced Functionality

- > Writing Python code blocks for logic
- > Accessing Revit API through Python
- > Managing lists structures in scripts
- > Debugging errors with handling techniques
- > Developing functions for repetitive tasks

15 Automating Design Analysis and Optimization Processes

- > Running structural energy performance simulations
- > Optimizing parameters with solver algorithms
- > Evaluating compliance against building standards
- > Generating design variants for comparison
- > Producing analytical reports from results

16 Orchestrating Multidisciplinary Workflows with AI Integration

- > Leveraging artificial intelligence for design support
- > Generating interactive visualizations and reports
- > Exporting rendered outputs with documentation
- > Implementing automated backup version protocols
- > Deploying workflows across engineering teams

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
