

PROFESSIONAL CERTIFICATION

Creo Parametric Training

The Creo Parametric Course covers 3D modeling for product design. Participants learn sketching features assemblies and drawings. Training includes surface modeling simulation and manufacturing integration for engineering applications in aerospace automotive and consumer products.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Creo Parametric Course

It is the tool to learn parametric modeling with Creo software.

Course Description

This course teaches Creo Parametric for advanced product design. Master top-down design behavioral modeling and multi-CAD collaboration. Projects cover complex assemblies mechanisms and mold design for innovative engineering solutions.

Duration

40-48

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master Creo interface.
- ✓ Create sketched features.
- ✓ Build parametric assemblies.
- ✓ Perform mechanism analysis.
- ✓ Design complex surfaces.
- ✓ Integrate manufacturing data.
- ✓ Enhance design flexibility.

Target Audience

- Mechanical Engineers design.
- Fabrication pros in CAD.
- Automobile manufacturing.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic design knowledge needed.
- Computer with Creo installed.
- Interest in advanced modeling.

Creo Parametric Course

Start with Creo basics and sketching tools.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
40 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
44 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
48 Hrs

Creo Parametric Course

Start with Creo basics and sketching tools.

01 Introduction to Creo Parametric

- > Overview of CAD and the role of Creo Parametric
- > Understanding the user interface and navigation
- > Basic functionalities and tools
- > System Requirements
- > Project Setup Basics

02 Sketching Fundamentals

- > Creating 2D sketches
- > Applying constraints and dimensions
- > Best practices for effective sketching
- > Sketch Editing Tools
- > Geometric Constraints

03 Basic Part Modeling

- > Introduction to part modeling
- > Creating features extrude revolve and sweep
- > Editing and modifying part features
- > Basic Feature Patterns
- > Part Regeneration

04 Advanced Part Modeling Techniques

- > Using advanced features holes ribs and patterns
- > Creating complex geometries with blends and lofts
- > Understanding feature relationships
- > Advanced Sweeps and Blends
- > Feature Failure Resolution

05 Assembly Modeling

- > Creating assemblies from parts
- > Applying assembly constraints
- > Managing component relationships and layouts
- > Assembly Exploded Views
- > Interference Checking

06 Advanced Assembly Techniques

- > Motion analysis and assembly animation
- > Using skeleton models for assembly design
- > Best practices for managing large assemblies
- > Mechanism Design
- > Assembly Optimization

Creo Parametric Course

Start with Creo basics and sketching tools.

07 Creating and Detailing Drawings

- > Generating 2D drawings from 3D models
- > Adding annotations dimensions and symbols
- > Managing multiple views and layouts
- > Drawing Templates
- > Drawing Standards Compliance

08 Sheet Metal Design

- > Introduction to sheet metal features
- > Creating flat patterns and forming operations
- > Working with sheet metal assemblies
- > Sheet Metal Bends and Flanges
- > Sheet Metal Conversion

09 Plastic Part Design

- > Understanding considerations for plastic parts
- > Creating mold features and managing drafts
- > Designing core and cavity assemblies
- > Mold Base Design
- > Injection Molding Simulation

10 Parametric Design Principles

- > Introduction to parameters and relations
- > Creating flexible designs with parametric modeling
- > Managing parameters effectively
- > Relation Equations
- > Parameter Tables

11 Family Tables and Design Reuse

- > Utilizing Family Tables for design variants
- > Understanding instances and parameters
- > Best practices for reusing designs
- > Generic Models
- > Instance Management

12 Rendering and Visualization

- > Introduction to rendering tools in Creo
- > Creating realistic visualizations of models
- > Exporting images and creating animations
- > Material Application
- > Lighting Setup

Creo Parametric Course

Start with Creo basics and sketching tools.

13 Customization and Automation

- > Customizing the Creo interface for user efficiency
- > Introduction to the Creo API and automation tools
- > Creating simple macros and scripts
- > Advanced Macro Development
- > API Programming Basics

14 Optimization Techniques

- > Understanding design optimization concepts
- > Using Creo's optimization tools for enhanced performance
- > Best practices for achieving design goals
- > Topology Optimization
- > Simulation Integration

15 Surfacing and Freeform Design

- > Introduction to Surfacing Tools
- > Creating Freeform Surfaces
- > Advanced Surface Editing
- > Surface Analysis
- > Hybrid Modeling

16 Project Management and Collaboration

- > Managing Creo Projects
- > Collaboration Tools
- > Data Management Best Practices
- > Version Control
- > Integration with PLM Systems

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
