

PROFESSIONAL CERTIFICATION

Lumion Training

The Lumion Course introduces real-time rendering for architectural visualization. Learners explore scene creation material application lighting effects and animation. Practical training includes building 3D environments adding context and producing high-quality images and videos to communicate design intent effectively in presentations and marketing.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Lumion Course

It is a way to learn fast rendering with Lumion for designs.

Course Description

This course provides hands-on training in Lumion for rapid architectural visualization. Master importing models applying materials creating landscapes and animating scenes. Projects focus on photorealistic renders 360 panoramas and VR outputs for professional use in architecture real estate and urban planning.

Duration

20-25

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master Lumion interface.
- ✓ Create realistic scenes.
- ✓ Apply advanced materials.
- ✓ Set dynamic lighting.
- ✓ Produce animations videos.
- ✓ Generate 360 panoramas.
- ✓ Enhance presentation outputs.

Target Audience

- Architecture for visuals.
- Interior Designers rendering.
- 3D Modelers in scenes.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic 3D modeling knowledge.
- Computer with Lumion installed.
- Interest in visualization.

Lumion Course

Begin with Lumion basics and scene building.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
20 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
23 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
25 Hrs

Lumion Course

Begin with Lumion basics and scene building.

01 Navigating Lumion Interface and Project Setup

- > Explore main toolbar layout for efficient workflow access
- > Customize workspace views and navigation controls effectively
- > Manage scene tabs for multiple project variations seamlessly
- > Import 3D models from various design software platforms
- > Organize layers and groups to structure complex scenes

02 Importing and Preparing Models for Rendering

- > Use live sync features for seamless model updates
- > Adjust import scale and orientation for accurate placement
- > Apply basic transformations to position imported geometry
- > Handle file formats compatibility across CAD and BIM tools
- > Optimize model cleanup before entering Lumion environment

03 Assigning and Editing Materials in Lumion

- > Browse and apply library materials to model surfaces quickly
- > Modify standard material properties for realistic appearance
- > Create custom materials using texture maps and adjustments
- > Adjust glass water and reflective properties accurately
- > Save personalized material presets for project consistency

04 Enhancing Surfaces with Advanced Material Techniques

- > Implement bump normal and displacement mapping for detail
- > Apply emissive and self-illuminating materials for lighting
- > Utilize layered materials for complex surface combinations
- > Fine-tune subsurface scattering on organic and translucent objects
- > Optimize material performance for large-scale scene rendering

05 Controlling Landscape and Terrain Modeling

- > Sculpt terrain using built-in brushes for natural shaping
- > Import heightmap data to create accurate site topography
- > Add water bodies with realistic wave and reflection controls
- > Merge imported models with terrain for seamless integration
- > Apply erosion and weathering effects for realistic landscapes

06 Placing and Managing Vegetation and Nature Assets

- > Populate scenes with high-quality trees plants and grass
- > Use mass placement tools for efficient forest and meadow creation
- > Adjust seasonal variations and wind animation on vegetation
- > Customize plant density and variation for natural distribution
- > Organize nature layers for easy editing and performance

Lumion Course

Begin with Lumion basics and scene building.

07 Setting Up Realistic Lighting and Sky Conditions

- > Control sun position and time-of-day for dynamic lighting
- > Apply HDRI environments for accurate global illumination
- > Add artificial lights including omni spot and area sources
- > Balance interior and exterior lighting for cohesive scenes
- > Simulate atmospheric conditions like fog and haze realistically

08 Implementing Advanced Lighting Strategies

- > Utilize ray-traced lighting for enhanced shadow accuracy
- > Create custom light profiles for IES-based fixtures
- > Combine sun sky and emissive sources for mood control
- > Adjust global illumination settings for interior realism
- > Fine-tune exposure and contrast in challenging lighting setups

09 Adding Characters Objects and Scene Details

- > Place animated people vehicles and animals from library
- > Position furniture props and urban elements effectively
- > Apply decals and surface details for added realism
- > Use object variation tools to avoid repetitive appearances
- > Manage asset categories for quick scene population

10 Creating Still Images in Photo Mode

- > Compose camera views with precise framing tools
- > Capture high-resolution still renders with effect stacks
- > Apply post-processing effects for stylistic enhancements
- > Use photo matching to align renders with real-site photos
- > Export images in various formats for presentation use

11 Building Animations and Walkthrough Sequences

- > Set up keyframe paths for smooth camera movement
- > Apply advanced move effects for dynamic object animation
- > Create layered animation clips for complex storytelling
- > Synchronize multiple camera paths for professional sequences
- > Render time-lapse and phased construction animations

12 Applying Effects Stack for Cinematic Quality

- > Stack weather volumetric and atmospheric effects realistically
- > Enhance renders with lens flares depth of field and bloom
- > Use color correction and film-style effects for mood
- > Control ray-traced volumetrics for realistic light scattering
- > Balance effect intensity to maintain performance efficiency

Lumion Course

Begin with Lumion basics and scene building.

13 Optimizing Scenes for Performance and Quality

- › Monitor system resources during complex scene building
- › Use proxy and simplified representations for heavy assets
- › Adjust detail levels across objects and vegetation
- › Implement render settings for faster preview iterations
- › Troubleshoot common performance bottlenecks effectively

14 Producing Final Outputs and Deliverables

- › Render ultra-high-resolution images and panoramas
- › Export animation videos in professional quality formats
- › Create 360 virtual tours for immersive client experiences
- › Prepare print-ready and web-optimized output files
- › Organize project assets and scenes for team collaboration

15 Advanced Lumion Effects and Cinematic Storytelling

- › Create custom styles and effect combinations for branding
- › Implement sound effects and audio for animated presentations
- › Design phased construction sequences with time-based effects
- › Produce architectural storytelling with character animations
- › Export to VR formats for immersive client walkthroughs

16 Team Collaboration and Project Workflow Management

- › Establish project templates and style standards for teams
- › Share scenes and assets via cloud collaboration platforms
- › Implement version control for iterative design reviews
- › Integrate Lumion with BIM workflows and model updates
- › Archive completed projects with full documentation packages

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
