# About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

## Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

## Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

## ★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

## Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

# Python Django Web Development

Build dynamic web backends with Python and Django framework.

## Course Description

This comprehensive course teaches you to develop robust web backend applications using Python and the Django framework. You will master essential concepts including project setup models and ORM database integration views and URLs templates forms user authentication REST APIs and deployment. Through hands-on projects gain practical skills to create secure

## Duration

# 60

Hours of Training

## Format

# Classroom / Online

Flexible Option

## Key Outcomes

- ✓ Set up Django projects and applications
- ✓ Create and manage models with ORM
- ✓ Build views URLs and templates
- ✓ Implement user authentication and authorization
- ✓ Develop RESTful APIs with Django REST
- ✓ Handle forms and static files efficiently
- ✓ Deploy Django applications to production servers

## Target Audience

- Aspiring web developers seeking backend specialization
- Programmers wanting to learn Django framework
- Students and professionals building full-stack skills

## Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

## Prerequisites

- Basic knowledge of Python programming
- Understanding of HTML and CSS fundamentals
- Familiarity with databases like SQL

# Python Django Web Development

Start your journey into professional web backend development with structured modules covering Python Django fundamentals to advanced deployment techniques.

## 01 Introduction to Web Development and How the Web Works

- > How the internet works (clients servers and HTTP requests)
- > Understanding frontend vs backend vs full stack development
- > Overview of the web development stack HTML CSS JS Python Django
- > Setting up your development environment VS Code and browser tools
- > How a web page is requested and rendered in the browser

## 02 HTML Fundamentals (Building Web Page Structure)

- > HTML document structure DOCTYPE html head and body tags
- > Working with headings paragraphs links images and lists
- > Building forms with input fields buttons and labels
- > Using semantic HTML elements (header nav main footer section)
- > Creating tables and organizing data in HTML correctly

## 03 CSS Fundamentals (Styling and Layout)

- > CSS syntax selectors properties and values basics
- > Styling text fonts colors backgrounds and borders
- > Box model (margin padding border and content explained)
- > CSS Flexbox for building responsive row and column layouts
- > CSS Grid for creating multi-column page layouts easily

## 04 Responsive Web Design and CSS Advanced

- > Media queries for mobile tablet and desktop breakpoints
- > Building a fully responsive webpage from scratch
- > CSS variables for reusable colors fonts and spacing values
- > CSS transitions and hover effects for interactive elements
- > Positioning — static relative absolute fixed and sticky

## 05 JavaScript Fundamentals (Making Pages Interactive)

- > Variables data types and operators in JavaScript
- > Conditionals if else and switch statements with examples
- > Loops ( for while and forEach for repeating actions)
- > Functions (declaring calling and returning values)
- > Arrays and objects (storing and accessing collections of data)

## 06 JavaScript DOM and Browser Interaction

- > Selecting HTML elements using getElementById and querySelector
- > Changing text content styles and attributes with JavaScript
- > Handling user events (click submit keypress and mouseover)
- > Building interactive forms with real-time validation feedback
- > Fetch API basics ( loading data from a URL with JavaScript)

# Python Django Web Development

Start your journey into professional web backend development with structured modules covering Python Django fundamentals to advanced deployment techniques.

## 07 Python Fundamentals ( Core Programming Concepts)

- > Python syntax variables strings numbers and booleans
- > Conditionals loops and range for program flow control
- > Functions ( defining parameters return values and scope)
- > Lists tuples dictionaries and sets with practical examples
- > File handling ( reading and writing files with Python)

## 08 Python Intermediate ( OOP and Modules)

- > Object-oriented programming ( classes objects and methods)
- > Inheritance and method overriding in Python classes
- > Using built-in modules ( os sys math datetime and random)
- > Installing and using third-party packages with pip
- > Virtual environments ( creating and managing project environments)

## 09 SQL and Database Fundamentals

- > What is a database and how relational databases work
- > Creating tables with correct data types and constraints
- > INSERT SELECT UPDATE and DELETE SQL statements
- > Filtering data with WHERE ORDER BY GROUP BY and HAVING
- > Joining tables — INNER JOIN LEFT JOIN and relationships

## 10 Django Fundamentals (Framework Setup and Structure)

- > What Django is and how the MTV architecture works
- > Installing Django and creating your first Django project
- > Understanding project structure ( settings urls apps and manage.py)
- > Creating a Django app and registering it in the project
- > Django development server and running your first page

## 11 Django Models ( Database Design with ORM)

- > Creating Django models and defining fields and data types
- > Running migrations to create and update database tables
- > Django ORM (querying creating updating and deleting records)
- > Model relationships ( ForeignKey OneToOne and ManyToMany)
- > Using Django admin panel to manage database records visually

## 12 Django Views and URL Routing

- > Function-based views — handling requests and returning responses
- > URL patterns — mapping URLs to views using urlpatterns
- > Passing data from views to templates using context dictionaries
- > Class-based views ( ListView DetailView CreateView basics )
- > URL namespacing and using reverse and redirect in views

# Python Django Web Development

Start your journey into professional web backend development with structured modules covering Python Django fundamentals to advanced deployment techniques.

## 13 Django Templates ( Dynamic HTML Pages )

- > Django template language ( variables tags and filters )
- > Template inheritance using extends and block tags
- > Looping over data and conditionals inside templates
- > Using static files ( CSS JS and images in templates)
- > Building a base template shared across all pages

## 15 Django User Authentication and Sessions

- > Using Django built-in authentication — login logout register
- > Creating user registration and login forms from scratch
- > Protecting views with login\_required decorator
- > Managing user sessions and storing session data
- > Displaying different content for logged-in vs guest users

## 14 Django Forms and User Input Handling

- > Creating Django forms using forms.Form and forms.ModelForm
- > Rendering forms in templates and handling POST requests
- > Form validation ( built-in validators and custom validation )
- > Saving form data to the database using form.save()
- > Displaying form errors and success messages to users

## 16 Building and Deploying a Full Stack Django Project

- > Planning and building a complete full stack web application
- > Connecting all layers ( models views templates forms and auth )
- > Handling media file uploads ( images and documents in Django )
- > Preparing the project for deployment ( DEBUG settings and static files )
- > Deploying Django app to a live server using shared hosting or PythonAnywhere

## Final Projects and Assement:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

**Muppuli Raja**

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

**Arun**

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

**Harshu CH**

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

**Ranjan Axalan**

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

**Numan**

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

**Lelanie Fernandez**

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

**Aman Bakhtiyar**

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

**Sana Zahid -**

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

**Cleavon Henderson**

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

**Danish Khan**

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!
