

PROFESSIONAL CERTIFICATION

Revit Architecture Training

This course introduces Revit for architectural modeling and design. Learn tools like walls doors windows floors roofs stairs and ramps. Create plans and detailed drawings with BIM templates. Ideal for architects interior designers and BIM starters. Master parameters and complete DM regulations for submissions. Build skills for professional career in BIM.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Revit Architecture Course

Explore Revit for architectural BIM modeling and drafting.

Course Description

This course covers Revit essentials for architecture. Use tools for walls doors windows and more. Develop plans sections and details. For BIM beginners learn templates and settings. Understand parameters and DM regulations. Prepare for submissions and industry standards. Gain confidence in modeling.

Duration

35-48

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Plan creation skills
- ✓ Detail drawings mastery
- ✓ Learn BIM templates
- ✓ Setting parameters expertise
- ✓ Wall door window tools
- ✓ Stairs ramp railing skills
- ✓ DM regulation submission

Target Audience

- Architects starting BIM career path
- Interior designers entering BIM field
- BIM technicians and modelers

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basics of architectural design
- Good computer operating skills
- No previous Revit experience required

Revit Architecture Course

Initiate with Revit Fundamental and architectural tools.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
35 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
42 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
48 Hrs

Revit Architecture Course

Initiate with Revit Fundamental and architectural tools.

01 Introduction to Revit Interface and Navigation Essentials

- > Navigate Revit interface components for efficient project setup
- > Customize workspaces and toolbars to boost productivity
- > Use project templates and standards for consistency
- > Organize views and browser for smooth model navigation
- > Apply essential keyboard shortcuts to speed up operations

02 Fundamental Modeling of Walls and Structural Elements

- > Create parametric walls with material and height controls
- > Insert doors and windows with accurate placement tools
- > Build floor systems using layered structure definitions
- > Model basic roofs via footprint and extrusion methods
- > Add structural columns and beams for support integration

03 Editing and Modifying Architectural Components

- > Modify element properties using type and instance parameters
- > Align and dimension elements for precise adjustments
- > Duplicate elements with copy mirror and array commands
- > Trim and extend geometry for clean model refinement
- > Detect and resolve interference conflicts in the model

04 Creating and Managing Revit Families

- > Build custom families from generic template files
- > Add parameters and formulas for flexible family behavior
- > Load and place families correctly in project models
- > Edit nested families to create complex assemblies
- > Organize family libraries for efficient asset reuse

05 Working with Views and Documentation Setup

- > Generate floor plans sections and elevations automatically
- > Apply view templates to standardize presentation styles
- > Create callout and detail views for focused documentation
- > Control visibility graphics overrides for clear views
- > Prepare sheets with title blocks and schedule placement

06 Annotation Detailing and Dimensioning Techniques

- > Place tags and text notes for element identification
- > Add aligned and equality dimensions automatically
- > Create detail components and filled regions effectively
- > Insert keynotes and schedules for consistent annotation
- > Track changes using revision clouds and clouds

Revit Architecture Course

Initiate with Revit Fundamental and architectural tools.

07 Site Design and Topography Modeling

- › Import topographic data to create accurate site surfaces
- › Model building pads and subregions for terrain adjustment
- › Place parking landscaping and site accessory components
- › Analyze contours and calculate cut-fill volumes
- › Coordinate site utilities with linked architectural models

08 Incorporating Structural and MEP Systems

- › Link structural models for accurate coordination checks
- › Model basic HVAC ducts and piping parametrically
- › Place electrical fixtures and conduits in floor plans
- › Run clash detection across architectural and MEP elements
- › Produce coordinated sections for multidisciplinary review

09 Collaboration and Worksharing in Teams

- › Establish central models for multi-user simultaneous access
- › Synchronize local files using effective workset strategies
- › Assign elements to worksets for clear ownership control
- › Manage borrowing and relinquishment requests efficiently
- › Apply phasing tools to represent construction timelines

10 Scheduling and Quantity Takeoffs

- › Generate material takeoff schedules for accurate estimation
- › Create room and area schedules with calculated values
- › Filter and sort schedules for project-specific reporting
- › Export schedule data to external cost and analysis tools
- › Maintain dynamic schedule updates with model modifications

11 Parametric Design with Constraints and Formulas

- › Apply dimensional constraints to preserve design relationships
- › Use formulas to automate parameter value calculations
- › Develop adaptive components for context-sensitive behavior
- › Include reporting parameters for real-time data monitoring
- › Refine designs through iterative constraint optimization

12 Customizing Families and Advanced Modeling Workflows

- › Create parametric arrays for scalable family designs
- › Use void forms to subtract complex geometric shapes
- › Build custom curtain wall systems with unique mullions
- › Develop conceptual massing studies for early exploration
- › Refine unique features using in-place component editing

Revit Architecture Course

Initiate with Revit Fundamental and architectural tools.

13 Architecture Modeling for Dubai-Specific Projects

- › Apply Dubai Municipality BIM standards for compliant models
- › Configure models to satisfy mandatory IFC export rules
- › Implement Level of Information Need per project requirements
- › Geo-reference models following local site coordination protocols
- › Prepare architectural submissions for building permit approval

14 Rendering Visualization and Presentation Outputs

- › Assign materials and textures for realistic appearances
- › Configure lighting and cameras for effective scene setup
- › Produce high-quality renders using cloud processing
- › Generate walkthrough animations for project presentations
- › Export visualizations to VR formats for client review

15 BIM Data Management and Industry Workflows

- › Track model progression using defined LOD standards
- › Manage linked files and perform regular coordination reviews
- › Utilize BIM 360 for secure cloud-based team collaboration
- › Integrate energy analysis with compatible external tools
- › Archive projects with complete audit trails for compliance

16 Project Coordination Clash Detection and Quality Control

- › Perform comprehensive clash detection across disciplines
- › Resolve conflicts using interference check reports
- › Coordinate models with linked files and copy/monitor tools
- › Audit models for errors and inconsistencies regularly
- › Implement quality control checklists for model integrity

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
