About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Revit Facade Customized Module Course

Develop custom parametric facades railings cladding and shading in Revit for architectural BIM projects.

Course Description

This specialized module focuses on Revit facade customization covering adaptive curtain wall families pattern-based panels custom railing tools cladding assemblies shading devices detailed modeling schedules and integration for high-performance building envelopes.

Duration

30-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Build parametric curtain wall families
- ✓ Create adaptive panel components
- ✓ Design custom railing systems
- ✓ Model cladding and panel assemblies
- ✓ Add sunshade and shading elements
- ✓ Generate facade schedules and details
- ✓ Coordinate facade with structural model

Target Audience

- Architects specializing in building envelopes
- Facade detailers using Revit
- BIM coordinators for exteriors

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Intermediate Revit knowledge
- Experience with walls and families
- Understanding of facade systems

Revit Fascade Course

Begin mastering tailored parametric solutions for modern facade railings cladding and shading elements.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
30 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
38 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
45 Hrs

Revit Facade Course

Begin mastering tailored parametric solutions for modern facade railings cladding and shading elements.

01 Introduction to Revit Interface for Facade Workflows

- > Navigate Revit interface optimized for facade engineering tasks
- > Customize views toolbars and workspaces for envelope precision
- > Utilize facade-specific project templates and standards
- > Organize project browser and views for layered facade control
- > Implement keyboard shortcuts to enhance facade modeling speed

02 Architectural Base Modeling for Facade Integration

- > Establish core architectural geometry as facade reference framework
- > Model floors walls roofs and openings with envelope alignment
- > Set up levels grids reference planes and shared coordinates
- > Link facade specialist models to central architectural file
- > Configure visibility graphics overrides for facade clarity

03 Conceptual Massing and Advanced Facade Family Development

- > Generate conceptual mass forms for early facade studies
- > Apply adaptive components and divided surfaces for pattern control
- > Create parametric nested and formula-driven facade families
- > Develop repeater patterns and surface-based panelization logic
- > Incorporate reporting parameters for performance tracking

04 Curtain Wall Systems and Custom Mullions

- > Model embedded and unitized curtain wall systems parametrically
- > Create custom mullion profiles and corner conditions
- > Apply glazing types and spandrel panels with materials
- > Adjust grid spacing and mullion depths dynamically
- > Integrate curtain walls with structural elements

05 Cladding Assemblies and Panelization

- > Design rainscreen and insulated cladding assemblies
- > Panelize surfaces with custom adaptive panel families
- > Model fixing systems brackets and thermal breaks
- > Optimize panel joints seals and drainage details
- > Generate fabrication-ready panel schedules

06 Solar Control Elements and Shading Devices

- > Create parametric brise-soleil and louver families
- > Model kinetic and fixed shading devices
- > Integrate fins screens and overhangs for sun control
- > Analyze shading performance with solar studies
- > Adjust parameters for seasonal optimization

Revit Fascade Course

Begin mastering tailored parametric solutions for modern facade railings cladding and shading elements.

07 Structural Support Detailing for Facades

- > Model steel aluminum support frames and brackets
- > Detail anchor points embeds and connections
- > Create custom structural families for facade integration
- > Coordinate facade supports with building structure
- > Generate connection details and schedules

08 Material Performance Specification and Libraries

- > Specify high-performance materials with thermal properties
- > Build custom material libraries for facade elements
- > Apply multi-layered assemblies with insulation voids
- > Incorporate acoustic and fire-rating data
- > Export material data for performance simulation

09 Multidisciplinary Coordination and Clash Detection

- > Link MEP and structural models for facade coordination
- > Run interference checks on facade assemblies
- > Resolve clashes with adaptive adjustments
- > Use coordination views and reports for documentation
- > Implement worksharing for team collaboration

10 Documentation and Detailing for Fabrication

- > Create detailed facade elevation section views
- > Add dimensions annotations and keynotes
- > Generate shop drawings and fabrication details
- > Produce panel fabrication schedules and BOMs
- > Export to CNC and manufacturing formats

11 Performance Analysis and Optimization

- > Integrate with Insight for energy analysis
- > Run solar radiation and daylight simulations
- > Optimize facade parameters for thermal performance
- > Analyze wind loads and structural behavior
- > Iterate designs based on simulation feedback

12 Sustainable Design and Green Building Compliance

- > Incorporate LEED and green building standards
- > Model green walls and vegetative facades
- > Specify low-emission and recycled materials
- > Analyze lifecycle and embodied carbon data
- > Prepare sustainability reports and certifications

Revit Facade Course

Begin mastering tailored parametric solutions for modern facade railings cladding and shading elements.

13 Advanced Parametric Facade Scripting with Dynamo

- › Use Dynamo for complex facade panelization
- › Automate pattern generation with attractors
- › Link Revit parameters to Dynamo scripts
- › Optimize facade geometry programmatically
- › Export parametric data for fabrication

15 Dubai-Specific Facade Regulations and Submissions

- › Apply Dubai Municipality facade standards
- › Prepare models for DM permit submissions
- › Incorporate DEWA and RTA coordination requirements
- › Generate IFC exports with required attributes
- › Document compliance with local building codes

14 BIM Execution Planning for Facade Projects

- › Develop facade-specific BEP and LOD matrix
- › Define information requirements for envelope
- › Set up data drops and model progression specs
- › Manage facade model federation and versioning
- › Ensure compliance with ISO 19650 standards

16 Facade Project Delivery and Handover Processes

- › Prepare final facade documentation packages for submission
- › Generate as-built models with complete element data
- › Export COBie and facility management information
- › Archive facade models with version control systems
- › Establish maintenance protocols for facade systems

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
