

PROFESSIONAL CERTIFICATION

Revit MEP Training

This course covers Revit for mechanical electrical and plumbing systems. Learn ducting routing power lighting and alarms. Create plans sections and details with tools. Ideal for engineers draftsmen and BIM starters in MEP. Master templates parameters and DM regulations for submissions. Develop skills for comprehensive MEP design.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★ Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Revit MEP Course

Master Revit MEP for electrical and mechanical modeling.

Course Description

This course trains in Revit MEP tools. Design duct power lighting and plumbing networks. Produce floor plans sections and RCP. For MEP professionals learn templates and settings. Understand parameters and many features. Comply with DM regulations. Ready for submissions and career in BIM.

Duration

35-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Duct and RCP planning
- ✓ Power lighting design
- ✓ Smoke alarm integration
- ✓ Duct routing skills
- ✓ Plumbing network creation
- ✓ BIM template mastery
- ✓ DM regulation submission

Target Audience

- Mechanical engineers entering BIM
- Electrical engineers in MEP field
- MEP draftsmen starting BIM career

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic MEP engineering knowledge
- Computer skills in technical design
- No prior Revit MEP experience

Revit MEP Course

Begin studying MEP systems and Revit tools.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
35 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
40 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
45 Hrs

Revit MEP Course

Begin studying MEP systems and Revit tools.

01 Introduction to Revit MEP Interface and Navigation

- > Explore Revit MEP user interface for MEP workflows
- > Customize views toolbars and workspaces efficiently
- > Use project templates tailored for MEP disciplines
- > Organize project browser and views for MEP focus
- > Apply keyboard shortcuts to accelerate MEP tasks

02 Setting Up MEP Projects and Linking Models

- > Start MEP projects from architectural links
- > Establish levels grids and shared coordinates accurately
- > Link and coordinate with architectural and structural models
- > Define discipline settings for MEP visibility control
- > Copy/monitor key elements from linked files

03 Fundamental MEP Component Placement

- > Place mechanical equipment and air terminals precisely
- > Insert plumbing fixtures and piping components
- > Add electrical devices lighting fixtures and panels
- > Use type catalogs for efficient component selection
- > Align and offset components for accurate positioning

04 Creating and Editing MEP Systems Basics

- > Define mechanical systems for air and hydronic networks
- > Create plumbing systems with supply and drainage
- > Establish electrical power and lighting circuits
- > Connect components to form intelligent systems
- > Use system browser to verify connectivity

05 Ductwork Modeling and Layout Techniques

- > Generate duct systems with sizing and routing tools
- > Apply duct fittings and accessories parametrically
- > Modify duct geometry using justification controls
- > Add insulation and lining to duct segments
- > Resolve duct routing conflicts automatically

06 Piping Systems Design for Mechanical and Plumbing

- > Model hydronic piping with automatic sizing rules
- > Create sanitary and domestic water pipe networks
- > Place valves pumps and fittings intelligently
- > Apply slope and routing preferences for plumbing
- > Use pipe accessories for system enhancements

Revit MEP Course

Begin studying MEP systems and Revit tools.

07 Electrical Systems and Circuiting Workflows

- Place panels transformers and switchgear accurately
- Create power and lighting circuits with load calculations
- Generate wiring and homeruns for documentation
- Balance panel loads using circuit editing tools
- Add cable trays and conduits for pathways

08 Spaces Zones and Load Analysis

- Create analytical spaces and zones for analysis
- Assign space properties for accurate data input
- Perform heating and cooling load calculations
- Generate reports from energy analysis tools
- Integrate gbXML export for external simulation

09 MEP Documentation Annotation and Detailing

- Place tags dimensions and text for MEP clarity
- Create detailed callouts sections and drafting views
- Develop legends for MEP symbols and abbreviations
- Configure view templates for consistent MEP drawings
- Add revision tracking and detail components

10 Creating and Managing MEP Schedules

- Build equipment duct and pipe schedules accurately
- Create panel schedules with circuit and load data
- Add calculated values and filters for MEP reporting
- Format and sort schedules for project requirements
- Place and modify schedules on sheets dynamically

11 Working with Sheets and Construction Documents

- Set up title blocks and sheets for MEP sets
- Place views schedules and legends on sheets
- Configure viewports and scale for clear presentation
- Add sheet-specific annotations and revisions
- Prepare print sets and export MEP documentation

12 Collaboration Worksharing and Coordination

- Set up central models for MEP team access
- Manage worksets for discipline-specific control
- Coordinate MEP with linked architectural models
- Perform interference checks for clash detection
- Resolve coordination issues using copy/monitor

Revit MEP Course

Begin studying MEP systems and Revit tools.

13 Custom MEP Families and Parameters

- › Create custom MEP families with connectors
- › Add parameters and formulas for flexibility
- › Nest families for complex MEP assemblies
- › Organize MEP family libraries effectively
- › Load and test families in project environments

14 Advanced System Analysis and Optimization

- › Analyze duct and pipe pressure losses systematically
- › Optimize system layouts for energy efficiency
- › Use system inspector for performance checks
- › Apply demand factors to electrical loads
- › Refine designs through iterative analysis

15 BIM Data Management and Industry Compliance

- › Implement LOD standards for MEP model progression
- › Manage linked files and coordination reviews
- › Utilize cloud platforms for MEP collaboration
- › Integrate MEP data with facility management tools
- › Archive MEP projects with audit compliance trails

16 MEP Modeling for Dubai-Specific Regulations

- › Apply Dubai Municipality BIM standards for MEP compliance
- › Configure models to meet mandatory IFC export rules
- › Implement Level of Information Need for MEP elements
- › Coordinate MEP with local authority submission protocols
- › Prepare MEP documentation for building permit approval

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
