

PROFESSIONAL CERTIFICATION

Revit Structure Training

This course teaches Revit for structural engineering and modeling. Explore beams columns slabs foundations trusses and systems. Create drawings with BIM coordination. Suitable for structure designers draftsmen and BIM coordinators. Learn templates parameters and DM regulations. Achieve professional submissions and complete understanding for career advancement.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Revit Structure Course

Learn Revit structure for BIM modeling and coordination.

Course Description

This course provides Revit training for structures. Use tools like beams columns and slabs. Develop foundations and truss systems. For BIM professionals master templates and settings. Cover parameters and DM regulations. Ensure submission readiness. Build expertise in structural design.

Duration

35-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Beam column slab tools
- ✓ Foundation creation skills
- ✓ Steel truss mastery
- ✓ Beam system understanding
- ✓ BIM template settings
- ✓ Parameter configuration expertise
- ✓ DM regulation compliance

Target Audience

- Structure designers using BIM tools
- Structural draftsmen in BIM
- BIM coordinators for structures

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic structural engineering concepts
- Computer proficiency in design
- No prior Revit software knowledge

Revit Structure Course

Commence with structural elements and Revit interface.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
35 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
40 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
45 Hrs

Revit Structure Course

Commence with structural elements and Revit interface.

01 Introduction to Revit Structure Interface and Navigation

- > Explore Revit Structure user interface for structural focus
- > Customize views toolbars and workspaces efficiently
- > Use structural project templates for consistent setup
- > Organize project browser and views for structural elements
- > Apply keyboard shortcuts to accelerate structural tasks

02 Setting Up Structural Projects and Linking Models

- > Initiate structural projects from architectural links
- > Establish levels grids and shared coordinates precisely
- > Link and coordinate with architectural and MEP models
- > Define structural discipline settings for visibility control
- > Copy/monitor key elements from linked architectural files

03 Fundamental Structural Modeling: Columns and Beams

- > Place structural columns with material and alignment controls
- > Add steel and concrete beams using framing tools
- > Create continuous beams and adjust justifications accurately
- > Model sloped and curved beams for complex geometries
- > Align and attach beams to columns for connectivity

04 Modeling Floors Slabs and Foundations

- > Create structural floors with compound layers and slopes
- > Model foundations including isolated footings and mats
- > Add foundation walls and piers for substructure support
- > Edit floor boundaries and add openings precisely
- > Incorporate slab edges and control joints effectively

05 Structural Walls and Framing Systems

- > Model load-bearing walls with structural properties
- > Create braced frames and moment frames parametrically
- > Place trusses and joists for floor and roof systems
- > Adjust wall alignments and attachments to floors
- > Resolve framing connections for structural integrity

06 Reinforcement Modeling for Concrete Elements

- > Add rebar to beams columns and slabs accurately
- > Create area reinforcement for slabs and walls
- > Place path reinforcement for irregular concrete shapes
- > Generate rebar schedules and bending details
- > Edit rebar covers and constraints for compliance

Revit Structure Course

Commence with structural elements and Revit interface.

07 Steel Connections and Detailing Workflows

- > Apply parametric steel connections from libraries
- > Customize connection types for beams and columns
- > Model base plates stiffeners and end plates
- > Generate steel connection details and reports
- > Coordinate steel detailing with fabrication outputs

08 Truss Modeling and Customized Steel Structures

- > Model standard and custom steel trusses parametrically
- > Create complex truss configurations with profile families
- > Customize truss geometry using adaptive and curved members
- > Develop specialized steel assemblies for unique projects
- > Optimize truss and steel framing through parameter control

09 Documentation Annotation and Detailing

- > Place tags dimensions and text for structural clarity
- > Create detailed callouts sections and elevation views
- > Develop legends for structural symbols and notes
- > Configure view templates for consistent drawings
- > Add revision tracking and detail components

10 Creating and Managing Structural Schedules

- > Build framing column and foundation schedules
- > Create rebar and material takeoff schedules
- > Add calculated values and filters for reporting
- > Format and sort schedules for project needs
- > Place and update schedules on sheets dynamically

11 Working with Sheets and Construction Documents

- > Set up title blocks and sheets for structural sets
- > Place views schedules and legends on sheets
- > Configure viewports and scales for clear presentation
- > Add sheet-specific annotations and revisions
- > Prepare print sets and export structural documentation

12 Collaboration Worksharing and Coordination

- > Establish central models for structural team access
- > Manage worksets for discipline-specific control
- > Coordinate structural model with linked disciplines
- > Perform interference checks for clash detection
- > Resolve issues using copy/monitor tools

Revit Structure Course

Commence with structural elements and Revit interface.

13 Custom Structural Families and Parameters

- › Create custom structural families with connectors
- › Add parameters and formulas for flexibility
- › Nest families for complex structural assemblies
- › Organize structural family libraries effectively
- › Load and test families in project environments

14 BIM Data Management and Industry Compliance

- › Implement LOD standards for structural progression
- › Manage linked files and perform coordination reviews
- › Utilize cloud platforms for structural collaboration
- › Integrate structural data with facility tools
- › Archive projects with audit compliance trails

15 Structural Modeling for Dubai-Specific Regulations

- › Apply Dubai Municipality BIM standards for structural compliance
- › Configure models to meet mandatory IFC export rules
- › Implement Level of Information Need for structural elements
- › Coordinate structural models with local submission protocols
- › Prepare structural documentation for building permit approval

16 Project Coordination Clash Resolution and Auditing

- › Run comprehensive multi-discipline clash detection
- › Resolve structural clashes using interference reports
- › Integrate Navisworks for advanced coordination checks
- › Audit structural models for errors and consistency
- › Apply quality checklists for final structural verification

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
