

PROFESSIONAL CERTIFICATION

Rhino 3D Training

This course teaches Rhino 3D for advanced modeling in architecture interiors and facades. Learn tools for solids surfaces sub D and shapes. Cover drafting options and many features. Suitable for architects designers draftsmen and modelers. Build models with precision and creativity. Gain skills for professional 3D work.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Rhino 3D Course

Explore Rhino 3D for solid surface and facade modeling.

Course Description

This course covers Rhino 3D essentials. Model interiors architecture facades and others. Use solid surface sub D tools. For professionals study shape drafting and options. Learn building techniques for accuracy. Prepare for advanced modeling with hands on sessions. Enhance skills in various design fields.

Duration

38-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Solid modeling skills
- ✓ Surface creation expertise
- ✓ Sub D tool mastery
- ✓ Shape drafting options
- ✓ Building model techniques
- ✓ Precision work proficiency
- ✓ Professional 3D enhancement

Target Audience

- Architects using advanced 3D tools
- Interior and facade designers
- Draftsmen becoming 3D modelers

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic 3D modeling knowledge
- Interest in complex shapes
- No previous Rhino experience

Rhino 3D Course

Begin with Rhino interface and 3D modeling fundamentals.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
38 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
42 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
45 Hrs

Rhino 3D Course

Begin with Rhino interface and 3D modeling fundamentals.

01 Mastering 2D Modeling and Drafting Fundamentals

- > Draw precise lines polylines rectangles circles arcs
- > Construct control point and interpolated smooth curves
- > Apply offsets fillets chamfers trim extend join
- > Organize layers groups blocks linetypes hatches properties
- > Add dimensions text leaders annotations title blocks

02 Setting Up Rhino for Architectural Projects

- > Configure units tolerances snap grid construction planes
- > Customize interface aliases shortcuts viewport layouts
- > Create project templates for consistent modeling
- > Control display modes edge visibility shading options
- > Manage object snaps tracking references for precision

03 Converting 2D Drawings into 3D Geometry

- > Extrude closed profiles into surfaces and solids
- > Revolve sections around axes for symmetrical volumes
- > Loft multiple contours for transitional building forms
- > Sweep profiles along planar or spatial paths
- > Project pull intersect curves onto target surfaces

04 Creating and Editing Architectural Solids

- > Generate primitives for initial massing elements
- > Perform union difference intersection split booleans
- > Fillet chamfer pipe blend solid edges smoothly
- > Shell solids to create wall thicknesses voids
- > Extract cap duplicate separate surfaces from solids

05 Building NURBS Surfaces for Forms

- > Construct single-span multi-span NURBS surfaces
- > Loft sweep revolve extrude surfaces from curves
- > Create planar ruled developable tangent surfaces
- > Patch blend extend surfaces to close boundaries
- > Match edges with position tangent curvature continuity

06 Refining NURBS Surfaces for Organic Shapes

- > Edit control points knots preserving curvature flow
- > Rebuild surfaces adjusting degree point count
- > Apply cage edit bend twist flow deformations
- > Extract isocurves sections tangents for refinement
- > Analyze zebra curvature graph draft angle maps

Rhino 3D Course

Begin with Rhino interface and 3D modeling fundamentals.

07 SubD Modeling for Fluid Sculptural Forms

- > Create SubD primitives convert from NURBS meshes
- > Manipulate vertices edges faces with soft editing
- > Apply creases weights chamfers bevels transitions
- > Bridge inset extrude subdivide smooth topology
- > Refine SubD for smooth watertight building skins

08 Hybrid NURBS and SubD Workflows

- > Convert SubD to NURBS for precise detailing
- > Use SubD for rapid conceptual organic massing
- > Blend NURBS precision with SubD sculptural regions
- > Extract clean NURBS patches from SubD models
- > Maintain continuity intent during format conversions

09 Developing Parametric Facade Patterns

- > Array distribute patterns onto reference surfaces
- > Morph geometry using domain UV mapping techniques
- > Generate modular repeating facade unit families
- > Introduce attractors gradients falloffs for variation
- > Create perforated textured louvered shading screens

10 Grasshopper Basics for Parameterization

- > Build scripts with geometry curve surface components
- > Connect sliders graphs domains expressions variables
- > Generate surface divisions panel grids point distributions
- > Apply field logic attractors for pattern control
- > Bake parametric elements into Rhino layers

11 Advanced Parametric Facade Panelization

- > Design adaptive curtain wall cladding panel families
- > Panelize freeform double-curved multi-directional surfaces
- > Generate structural grids mullions transoms joint systems
- > Optimize panel shapes for material fabrication rules
- > Create layered ventilated double-skin facade assemblies

12 Thickening Detailing Facade Envelopes

- > Offset thicken surfaces for structural cladding depth
- > Add reveals gaskets connections edge treatments
- > Model rainscreen insulation ventilation layer details
- > Ensure continuity watertightness thermal break integration
- > Detail custom interfaces with adjacent building elements

Rhino 3D Course

Begin with Rhino interface and 3D modeling fundamentals.

13 Analyzing Facade and Model Geometry

- › Evaluate curvature zebra draft angle Gaussian maps
- › Measure panel areas edge lengths deviation metrics
- › Check naked edges gaps intersections watertightness
- › Assess view cones solar access daylight factors
- › Identify geometric performance issues early

14 Optimizing Models for Performance

- › Reduce surface spans rebuild cleaner topology
- › Convert dense SubD to optimized NURBS meshes
- › Clean remove duplicates audit model integrity
- › Simplify geometry preserving design intent
- › Optimize large models for team collaboration

15 Architectural Rendering Techniques

- › Assign materials textures bump maps facade elements
- › Configure HDRI sun positioning lighting setups
- › Produce perspectives section perspectives details
- › Create cutaway exploded analytical facade views
- › Export images animations form facade sequences

16 Project Organization Professional Workflows

- › Structure hierarchical layers for massing facades
- › Use blocks groups instances repeatable modules
- › Manage references worksets linking collaborative projects
- › Implement version control model cleaning backups
- › Archive projects with metadata documentation handover

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
