

PROFESSIONAL CERTIFICATION

STAAD Pro Training

The STAAD Pro Course covers structural analysis and design software. Learners explore modeling load application and code compliance. Practical exercises include analyzing frames trusses and buildings producing design outputs for steel and concrete structures in civil engineering applications.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

STAAD Pro Course

It is a way to learn analysis with STAAD Pro for structures.

Course Description

This course teaches STAAD Pro for structural engineering. Master modeling analysis and design of buildings bridges and industrial structures. Hands-on projects cover load combinations code checks and optimization for safe efficient designs in civil and mechanical fields.

Duration

35-43

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master STAAD interface.
- ✓ Create structural models.
- ✓ Apply loads combinations.
- ✓ Perform static analysis.
- ✓ Design steel members.
- ✓ Analyze concrete structures.
- ✓ Generate design reports.

Target Audience

- Structure Designers analysis.
- Steel Industry professionals.
- Become Structure Engineer.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic engineering knowledge required.
- Computer skills needed.
- Interest in analysis tools.

STAAD Pro Course

Begin with STAAD basics and model setup.

Intermediate

- › Covers all Intermediate Levels
- › Precise Geometry Creation
- › Basic Parameters & Standards
- › Understanding of Tools & Uses
- › Intermediate Project Standard
- › 1 Project at Completion

Duration
35 Hrs

Professional

- › Covers all Professional Modules
- › 16 Standard Professional Modules
- › Learn with Industry Standard
- › Professional Tools and Uses
- › Multiple Professional Projects
- › 3 Projects at Completion

Duration
39 Hrs

Advanced (Customized)

- › Covers All Professional Modules
- › 16+ Advance Professional Module
- › Co-Ordination and Adv. Parameters
- › Shop Drawings & As Built Drawings
- › Govt. Standard and Submission
- › 4 Projects in Different Categories

Duration
43 Hrs

STAAD Pro Course

Begin with STAAD basics and model setup.

01 Exploring STAAD.Pro Interface Command Editor Configuration

- > Customize toolbars ribbon shortcuts workspace layout
- > Configure units preferences decimal precision colors
- > Master job setup model explorer input editor
- > Set grid systems snap controls coordinate references
- > Create steel templates with standard command blocks

02 Importing References Defining Nodes Members Geometry

- > Import scale DWG DXF PDF framing drawings
- > Define node coordinates joint merges incidences
- > Establish grids rotated systems story levels
- > Align column bases lock reference planes
- > Use generate repeat mirror circular commands

03 Material Properties Sections Database Management

- > Define steel materials yield modulus coefficients
- > Import edit AISC Eurocode BS IS databases
- > Create prismatic built-up tapered user profiles
- > Assign member properties beta angles groups
- > Specify code editions AISC Eurocode BS parameters

04 Modeling Beams Columns Braces Releases Offsets

- > Model beams columns with section assignments
- > Define bracing members tension-only compression-only
- > Apply end releases partial releases member specifications
- > Assign offsets member joint offsets accurately
- > Use truss specifications for efficient modeling

05 Support Definitions and Boundary Conditions

- > Define fixed pinned spring roller supports
- > Assign multi-linear soil springs for foundations
- > Specify enforced displacements and support settlements
- > Model inclined supports and master-slave nodes
- > Verify support reactions for model validation

06 Load Definitions Patterns and Combinations

- > Define dead live wind seismic temperature loads
- > Create load patterns primary and combination cases
- > Generate automatic wind seismic per code
- > Apply moving loads vehicle crane loads
- > Define notional loads for stability analysis

STAAD Pro Course

Begin with STAAD basics and model setup.

07 Advanced Analysis Setup and Options

- > Set linear nonlinear dynamic analysis parameters
- > Configure P-Delta large delta time history options
- > Define response spectrum functions modal analysis
- > Specify buckling modes and imperfection factors
- > Run batch analysis with convergence controls

08 Steel Design Parameters and Code Checks

- > Assign KY KZ LY LZ UNT UNB parameters
- > Define DJ1 DJ2 BEAM TRACK RATIO CMB
- > Specify MAIN TMAIN STEEL CHECK parameters
- > Perform code checks AISC Eurocode BS IS
- > Optimize members with auto-iteration design

09 Concrete Design Parameters and Detailing

- > Assign concrete design parameters FYMAIN FYSEC
- > Define beam column shear wall design codes
- > Perform RC design with bar detailing schedules
- > Check deflection serviceability crack width limits
- > Generate concrete design reports drawings

10 Post-Processing Results Interpretation

- > Display member forces deflections stresses
- > View mode shapes periods participation factors
- > Generate envelope diagrams for combinations
- > Extract joint reactions story drifts base shear
- > Create customized tables graphs reports

11 Model Validation and Error Checking

- > Check geometry connectivity duplicate nodes
- > Verify load equilibrium mass source errors
- > Analyze warnings unstable modes lost loads
- > Validate with hand calculations benchmark models
- > Refine mesh convergence study

12 Seismic Design and Detailing Provisions

- > Apply ductility detailing special seismic parameters
- > Define response reduction factors overstrength
- > Check drift limits torsional irregularity
- > Perform performance-based design pushover
- > Generate seismic detailing reports drawings

STAAD Pro Course

Begin with STAAD basics and model setup.

13 Optimization and Parametric Studies

- > Use parameter variation for sensitivity analysis
- > Optimize sections materials using design cycles
- > Apply genetic algorithm multi-objective optimization
- > Generate design alternatives cost comparisons
- > Export optimized models to detailing software

14 Integration with Other Software and BIM

- > Link with Revit Tekla for model import export
- > Integrate with SAFE for foundation design
- > Use STAAD Foundation Advanced for footing design
- > Export to RAM Steel RAM Connection
- > Implement BIM workflows IFC exchange

15 Dubai-Specific Code Compliance and Submissions

- > Apply Dubai Municipality seismic wind parameters
- > Prepare models for DM submission approval
- > Generate code compliance reports documentation
- > Incorporate local material section databases
- > Final structural model handover archiving

16 Advanced Steel Structures Modeling and Design

- > Model complex steel connections and joints
- > Apply advanced member specifications for trusses
- > Perform detailed steel frame stability analysis
- > Optimize for wind and seismic lateral systems
- > Generate advanced steel fabrication drawings

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
