

PROFESSIONAL CERTIFICATION

Sketchup Training

This course covers Sketchup for 3D modeling in architecture and interiors. Learn tools for dynamic components materials and representations. Create models for various fields. Ideal for architects interior designers draftsmen and modelers. Build skills for detailed 3D work and other elements. Gain proficiency in representation and component handling.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Sketchup Course

Master Sketchup 3D for interior and architecture modeling.

Course Description

This course trains in Sketchup 3D tools. Model interiors architecture and others. Develop dynamic components and materials. For professionals learn representation techniques. Cover detail things for comprehensive understanding. Prepare for modeling roles with hands on practice. Enhance design presentation skills.

Duration

30-40

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ 3D modeling basics
- ✓ Interior architecture skills
- ✓ Dynamic component creation
- ✓ Material application expertise
- ✓ Representation techniques
- ✓ Detail elements mastery
- ✓ Other modeling enhancements

Target Audience

- Architects doing 3D modeling
- Interior designers using 3D tools
- Draftsmen and 3D modelers

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic understanding of 3D concepts
- Computer skills in graphics design
- No prior Sketchup experience needed

Sketchup Course

Commence with Sketchup basics and 3D modeling tools.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
30 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
35 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
40 Hrs

Sketchup Course

Commence with Sketchup basics and 3D modeling tools.

01 Introduction to SketchUp Interface & Tools

- > Customize toolbars for personalized workflow efficiency
- > Navigate 3D views using orbit and pan commands
- > Utilize axes and inferences for accurate positioning
- > Set up units and templates for project consistency
- > Explore menus and dialogs for quick access

02 Creating Basic 2D Shapes and 3D Forms

- > Draw lines and arcs with precision tools
- > Extrude surfaces using push-pull technique
- > Construct rectangles and circles effectively
- > Form complex volumes from simple geometry
- > Apply offsets to create parallel elements

03 Editing Models with Transformation Commands

- > Move and copy entities accurately
- > Rotate objects around custom axes
- > Scale models proportionally or nonuniformly
- > Erase and soften edges selectively
- > Mirror geometry for symmetrical designs

04 Organizing Content Using Groups and Layers

- > Group entities to maintain model hierarchy
- > Assign layers for visibility control
- > Edit groups without affecting surroundings
- > Lock elements to prevent unintended changes
- > Nest groups for modular organization

05 Applying Materials and Textures to Surfaces

- > Import and edit material libraries
- > Map textures onto curved faces
- > Adjust scale and position of patterns
- > Create custom materials from images
- > Use color picker for precise matching

06 Managing Camera Views and Scene Creation

- > Set standard views for consistent orientation
- > Create scenes to capture perspectives
- > Animate transitions between saved views
- > Apply fog and shadows for realism
- > Export scenes as image sequences

Sketchup Course

Commence with Sketchup basics and 3D modeling tools.

07 Incorporating Extensions for Specialized Tools

- > Install extensions from Extension Warehouse
- > Use cleanup tools to optimize models
- > Apply bevel and follow-me extensions
- > Generate reports with attribute inspectors
- > Integrate section planes for analysis

08 Importing and Exporting Data Across Formats

- > Import CAD files for base geometry
- > Export models to 3D printing formats
- > Handle COLLADA and KMZ conversions
- > Merge external references seamlessly
- > Preserve metadata during file transfers

09 Precision Modeling with Guides and Measurements

- > Place guides for alignment references
- > Use tape measure for distance verification
- > Apply protractor for angle constraints
- > Create arrays with linear spacing
- > Employ sandbox for organic terrain

10 Developing Custom Styles and Model Templates

- > Customize edge and face styles
- > Save styles for reusable profiles
- > Design templates with predefined settings
- > Adjust watermark and background options
- > Export styles for team consistency

11 Building Dynamic Components with Attributes

- > Define attributes for interactive behaviors
- > Add formulas to control scaling
- > Configure options for user customization
- > Test dynamic interactions in models
- > Share components via 3D Warehouse

12 Creating Detailed Architectural and Interior Elements

- > Model walls doors and windows accurately
- > Build furniture and fixture libraries
- > Develop custom joinery and millwork details
- > Incorporate parametric components for interiors
- > Apply realistic finishes to architectural spaces

Sketchup Course

Commence with Sketchup basics and 3D modeling tools.

13 Preparing Models for 2D Documentation in LayOut

- > Send SketchUp scenes directly to LayOut
- > Create scaled orthographic views and plans
- > Add dimensions labels and annotations
- > Organize pages with title blocks and legends
- > Export professional construction documents

14 Mastering LayOut Tools for Presentation Sheets

- > Insert multiple viewports with overrides
- > Use scrapbooks for reusable symbols and details
- > Apply hatches and patterns to sections
- > Generate schedules and tables from model data
- > Produce high-quality PDF outputs efficiently

15 Modeling Complex Curved and Organic Forms

- > Use follow-me tool for extrusions along paths
- > Create smooth surfaces with extensions
- > Sculpt terrain and organic shapes effectively
- > Refine curves for furniture and architectural features
- > Combine tools for intricate detailing

16 Optimizing Model Performance and Geometry Cleanup

- > Identify and fix hidden geometry issues
- > Reduce file size with cleanup extensions
- > Purge unused components and materials
- > Maintain clean topology for large projects
- > Implement best practices for efficient modeling

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!
