

PROFESSIONAL CERTIFICATION

Solidworks Training

The Solidworks Course teaches 3D CAD for mechanical design. Learners explore part modeling assembly creation and drawing generation. Practical exercises include simulation sheet metal design and rendering for product development in manufacturing and engineering.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Solidworks Course

It is a way to learn 3D modeling with Solidworks tool.

Course Description

This course provides comprehensive Solidworks training for mechanical engineers. Master parametric modeling assemblies simulations and technical drawings. Hands-on projects cover product design prototyping and manufacturing preparation for industries like automotive aerospace and consumer goods.

Duration

40-50

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master Solidworks interface.
- ✓ Create parametric parts.
- ✓ Build complex assemblies.
- ✓ Perform simulations analysis.
- ✓ Design sheet metal.
- ✓ Generate technical drawings.
- ✓ Enhance product renders.

Target Audience

- Mechanical Engineers design.
- Fabrication pros modeling.
- Automobile in manufacturing.

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic design knowledge required.
- Computer skills needed.
- Interest in 3D CAD.

Solidworks Course

Learn Part Modelling, Assembly, Drawings and Simulation.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
40 Hours

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
45 Hours

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
50 Hours

Solidworks Course

Learn Part Modelling, Assembly, Drawings and Simulation.

01 Exploring the SOLIDWORKS User Interface and Navigation

- > Customize the Command Manager tabs and toolbars for faster workflow
- > Navigate and control the 3D viewport using mouse gestures efficiently
- > Organize and utilize the FeatureManager design tree for quick access
- > Configure document units precision and global properties accurately
- > Leverage the integrated search command tool for rapid feature location

02 Creating Precise and Fully Defined 2D Sketches

- > Draw accurate lines arcs circles and splines using sketch tools
- > Apply smart dimensions to fully define sketch size and location
- > Add geometric relations to enforce design intent and behavior
- > Edit and modify existing sketches while preserving design relationships
- > Convert and import entities from edges or other sketch geometry

03 Building Solid Models with Extrude and Boss Features

- > Extrude closed sketches to create primary solid base features
- > Control extrusion depth with blind through-all and mid-plane conditions
- > Incorporate draft angles to improve moldability and manufacturing
- > Generate thin-walled extrusions suitable for sheet-like components
- > Merge resulting bodies when creating multi-body part designs

04 Constructing Rotational and Path-Based Features

- > Revolve 2D sketches around selected axes to form symmetric solids
- > Sweep profiles along paths for complex tubular or wireframe parts
- > Loft multiple profiles to create transitional organic shapes
- > Apply guide curves to control sweep and loft trajectories precisely
- > Edit section profiles and paths for feature refinement

05 Advanced Sketching Techniques and Relations

- > Use spline tools for smooth freeform curves and surfaces
- > Apply equal length concentric and symmetric relations
- > Create derived sketches and mirrored entities efficiently
- > Utilize sketch pictures for tracing and reference
- > Analyze and repair over-defined or under-defined sketches

06 Shelling Filleting and Pattern Features

- > Apply shell feature to create thin-walled hollow parts
- > Add fillets and chamfers to edges and faces smoothly
- > Create linear circular and sketch-driven patterns
- > Use variable patterns for non-uniform distributions
- > Mirror features and bodies for symmetric designs

Solidworks Course

Learn Part Modelling, Assembly, Drawings and Simulation.

07 Assembly Modeling Fundamentals

- > Create new assemblies and insert components accurately
- > Apply mates coincident concentric tangent for positioning
- > Edit and suppress mates for assembly flexibility
- > Use smart mates for quick drag-and-drop assembly
- > Organize components with folders and configurations

08 Advanced Assembly Techniques and Configurations

- > Create subassemblies for modular design organization
- > Apply flexible subassemblies for motion allowance
- > Develop multiple configurations for design variations
- > Use design tables to drive configuration parameters
- > Implement speedpak for large assembly performance

09 Sheet Metal Design and Flat Patterns

- > Create base flanges edges and miter flanges
- > Add hems bends and jogs to sheet metal parts
- > Insert forming tools and louvers for features
- > Generate flat patterns with bend allowances
- > Export DXF for manufacturing and nesting

10 Top-Down Assembly Modeling and In-Context Editing

- > Create parts in-context of assembly references
- > Propagate changes from assembly to part level
- > Use external references for associative updates
- > Break and lock external references for control
- > Manage in-context features across multiple components

11 Drawing Views and Annotations

- > Generate standard orthographic and isometric views
- > Create section auxiliary and detail views precisely
- > Add dimensions notes and symbols accurately
- > Insert bill of materials and balloons
- > Customize drawing templates and sheet formats

12 Advanced Drawing Tools and Automation

- > Create broken-out sections and crop views
- > Add revision tables and weld symbols
- > Use custom properties for automated annotations
- > Generate exploded views with trail lines
- > Export drawings to PDF DWG and other formats

Solidworks Course

Learn Part Modelling, Assembly, Drawings and Simulation.

13 Motion Analysis and Simulation Basics

- > Define motors mates and contacts for assembly motion
- > Run basic kinematic motion studies
- > Plot displacement velocity acceleration graphs
- > Detect interferences during motion simulation
- > Export motion animations and results

14 Motion Simulation and Optimization

- > Apply gravity springs dampers and forces
- > Perform dynamic analysis with friction contacts
- > Optimize designs using motion study results
- > Create event-based motion with sensors
- > Generate load transfer to FEA studies

15 Finite Element Analysis Fundamentals

- > Set up static structural studies accurately
- > Apply materials fixtures and loads
- > Mesh models with automatic refinement controls
- > Run solvers and interpret stress strain results
- > Validate results with hand calculations

16 Surface Modeling for Complex Geometry

- > Create lofted and boundary surfaces smoothly
- > Use ruled and filled surfaces for transitions
- > Trim extend and knit surfaces watertight
- > Apply thicken offset to create solid bodies
- > Analyze surface quality with curvature combs

17 Configuration Management and Design Tables

- > Create multiple configurations within parts
- > Use design tables to drive dimensions features
- > Suppress unsuppress components in assemblies
- > Configure materials colors and appearances
- > Manage configurations for product variants

18 Professional Workflows and Best Practices

- > Implement PDM for version control collaboration
- > Use task pane for design library toolbox
- > Apply design for manufacturing DFM principles
- > Prepare models for 3D printing and CAM
- > Archive projects with pack and go

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
