

PROFESSIONAL CERTIFICATION

Vectorworks Course Training

Master Vectorworks the powerful CAD and BIM software for architecture landscape and entertainment design. This course covers essential 2D drafting 3D modeling workflows rendering and presentation techniques to build professional skills efficiently.

About Orbit Training Center

Your Gateway to Professional Excellence in Dubai

Who We Are

Established in 2023, Orbit Training Center is a leading professional training provider in Dubai, offering 60+ professional certification courses across diverse fields, including engineering, IT, design, and languages.

Our Benefits

-  Industry recognized certifications
-  Convenient location in the heart of Dubai
-  Affordable fees with multiple payment plans
-  Lifetime post-training support

★Our Features

-  Hands-on learning with real-world projects
-  Expert trainers with industry experience
-  Flexible learning options to fit your schedule
-  State-of-the-art infrastructure & facilities

Our Mission

We deliver outstanding courses, expert teaching, strong career guidance, and placement support to help every student achieve their best results. We stay connected with alumni through networking events, lifelong learning, and ongoing mentorship. We run our operations with smart systems and data-driven decisions to create a smooth, exceptional experience for all.

Vectorworks Course

Learn Vectorworks for architecture landscape and entertainment design.

Course Description

This comprehensive course introduces Vectorworks the industry-leading software for precise 2D and 3D design. Explore core tools layers classes hybrid modeling BIM workflows and rendering to create detailed plans models and presentations effectively.

Duration

30-45

Hours of Training

Format

Classroom / Online

Flexible Option

Key Outcomes

- ✓ Master Vectorworks interface and navigation
- ✓ Create efficient layers and classes
- ✓ Perform 2D drafting and 3D modeling
- ✓ Apply BIM workflows effectively
- ✓ Generate professional renderings
- ✓ Organize drawings with viewports
- ✓ Produce accurate construction documents

Target Audience

- Architects and landscape designers
- Entertainment and set designers
- Beginner to intermediate CAD users

Certification

- Certificate of Course Completion
- Industry Recognized Certification
- Trained by Certified Professionals

Prerequisites

- Basic computer navigation skills
- Understanding of drafting concepts
- Basic knowledge of design principles

Vectorworks Course

Start your journey to mastering Vectorworks with core concepts and tools.

Intermediate

- Covers all Intermediate Levels
- Precise Geometry Creation
- Basic Parameters & Standards
- Understanding of Tools & Uses
- Intermediate Project Standard
- 1 Project at Completion

Duration
30 Hrs

Professional

- Covers all Professional Modules
- 16 Standard Professional Modules
- Learn with Industry Standard
- Professional Tools and Uses
- Multiple Professional Projects
- 3 Projects at Completion

Duration
38 Hrs

Advanced (Customized)

- Covers All Professional Modules
- 16+ Advance Professional Module
- Co-Ordination and Adv. Parameters
- Shop Drawings & As Built Drawings
- Govt. Standard and Submission
- 4 Projects in Different Categories

Duration
45 Hrs

Vectorworks Course

Start your journey to mastering Vectorworks with core concepts and tools.

01 Mastering Spotlight Interface for Rigging & Event Design

- > Customize workspace for fast access to rigging and lighting tools
- > Organize palettes dedicated to truss hoist and fixture insertion
- > Set document units scales and snapping for venue accuracy
- > Use smart cursor and intelligent snapping for precise placement
- > Navigate 3D rigged setups with flyover walk-through and section views

02 Building Accurate Venue Plans and Stage Layouts

- > Import and correctly scale venue CAD drawings or blueprints
- > Draw stage decks wings audience areas and safety zones
- > Create rigging grids and reference lines for alignment
- > Generate shapes for barriers cable runs and temp structures
- > Refine geometry using offset fillet chamfer and trim tools

03 Editing and Transforming Rigging and Lighting Objects

- > Select duplicate and array trusses pipes and fixtures efficiently
- > Resize rotate and shear truss sections with numeric control
- > Mirror and flip elements for symmetrical stage designs
- > Align distribute and space multiple rigging components evenly
- > Edit vertices and convert object types on complex shapes

04 Organizing Projects with Layers and Classes

- > Build layer structure separating venue rigging lighting audio
- > Apply consistent class naming for all event disciplines
- > Control visibility graphics and editing per design phase
- > Save class/layer view combinations for quick switching
- > Reassign objects between classes while keeping data intact

05 Creating 3D Stage Truss and Rigging Geometry

- > Extrude and revolve 2D shapes into 3D stage platforms
- > Insert straight curved and circular truss from libraries
- > Modify truss length height and joints using editing tools
- > Work in multiple 3D views to check clearances and sightlines
- > Align components accurately using working planes

06 Working with Intelligent Truss Pipe and Symbols

- > Create reusable truss ladder and pipe symbols
- > Maintain manufacturer-specific libraries in Resource Manager
- > Edit symbols while preserving placed instances
- > Use parametric plug-ins for dynamic truss configurations
- > Insert symbols with automatic class and layer settings

Vectorworks Course

Start your journey to mastering Vectorworks with core concepts and tools.

07 Dimensioning and Annotating Rigging Drawings

- › Apply linear angular and radial dimensions to trusses
- › Customize dimension styles to match event standards
- › Add callouts labels and legends for loads and hardware
- › Create multi-leader notes for bridles and hoists
- › Keep annotations linked and updated with model changes

08 Setting Up Viewports and Production Sheets

- › Create scaled viewports for plans sections and details
- › Organize sheet layers for truss plots and load reports
- › Control viewport crops classes and annotation display
- › Set rendering modes and backgrounds per viewport
- › Maintain dynamic links between viewports and model

09 Applying Materials and Hatches for Clarity

- › Assign realistic materials to trusses and stage elements
- › Adjust texture mapping on curved and irregular surfaces
- › Create section hatches for structural cut views
- › Use gradients and image fills for deck surfaces
- › Preview rigged setups in real-time OpenGL mode

10 Attaching Load and Inventory Records

- › Build record formats for weight COG and point loads
- › Attach data to trusses hoists fixtures and accessories
- › Inherit records automatically through symbols
- › Generate schedules and inventory reports from records
- › Export data for production and coordination use

11 Using Truss Tools and Connection Features

- › Insert straight curved and circular trusses intelligently
- › Place lighting pipes and ladder bars with hang points
- › Connect elements using auto-join and connection tools
- › Configure rotations cross-bracing and joint types
- › Receive visual feedback on system connectivity

12 Placing Hoists Bridles and Ground Support

- › Insert chain hoists and motors at exact locations
- › Design bridle legs with calculated angles and forces
- › Add ground support towers and dead-hang solutions
- › Specify suspension types and working load limits
- › Check connection compatibility with Braceworks

Vectorworks Course

Start your journey to mastering Vectorworks with core concepts and tools.

13 Running Braceworks Structural Load Analysis

- › Apply point line and area loads to rigging objects
- › Perform finite element analysis on complete systems
- › Calculate hoist reactions and truss member stresses
- › View graphical stress and deflection results overlaid
- › Highlight overloaded or unsafe rigging components

14 Checking Rigging Systems for Errors and Safety

- › Execute automated connectivity and structural checks
- › Display warnings for disconnected or overloaded points
- › Verify compliance with rigging safety regulations
- › Review bridle hoist and truss workload distribution
- › Refine designs using detailed error feedback

15 Generating Reports and Production Documentation

- › Produce weight hoist and truss loading calculation reports
- › Create formatted FEA stress and deflection documentation
- › Generate rigging plots load sheets and inventory lists
- › Export complete packages for venue and promoter approval
- › Customize templates to match event industry needs

16 Automating and Collaborating on Event Projects

- › Build Marionette networks for layout automation
- › Script repetitive tasks with VectorScript or Python
- › Set up multi-user referencing for large productions
- › Exchange IFC data with structural consultants
- › Run clash detection across rigging and other disciplines

Final Projects and Assessment:

- **Assessment:** Project-based evaluation through real-world projects to assess practical skills and application without theory exams.
- **Tailored Curriculum:** Customized to industry standards, covering essential topics for professional development in relevant fields.
- **Hands-on Projects:** Real-world simulations and interactive tasks to build applicable skills and create professional portfolios.
- **Certification Prep:** Targeted review sessions, practice exercises, and strategies for achieving industry certifications.
- **Ongoing Support:** Access to recorded materials, forums, instructor guidance, and career assistance for long-term growth.

Muppuli Raja

One of great institute for REVIT BIM course. I completed my training with Mr Ahmed. He is one great trainer in this institute. He has very good knowledge for BIM Training. I completed my REVIT BIM training with orbit and it was very nice learning journey for me. And one of best thing is training center is very flexible for classes.

Arun

Best SolidWorks training in Dubai! The instructor made 3D modeling and assembly design easy to understand. The course covered all essential tools I need for product design and engineering work. Best training center for solidworks training. Best Training Center for Best Skills

Harshu CH

My experience at Orbit training center has been the best In every step I learn from there very clearly almost complete my course it's very interesting the trainer is the best professional and friendly ,and the rest of the team keep it up, thanks for supporting me Orbit and all staff...

Ranjan Axalan

I just finished my course in 3ds max. I learned a lot on how to create 3d model. Thank you for the experience and for the teaching method it help me to understand easily and grow my knowledge. I will use my learnings to my future company. Highly Recomanded!

Numan

I had good support from trainer Mr Ahmed and the other staff. They would schedule my BIM classes as per my convenience and would retake classes if I required. They always answer my calls when I need assistance. Not only that the trainer would go a mile a ahead by helping me with my work related issues like a true mentor.

Lelanie Fernandez

Overall, I highly recommend the Fusion 360 training at Orbit Center, especially with Ahmad as the instructor. This course has exceeded my expectations, and I am learning a lot. I would rate it 5 out of 5 stars!

Aman Bakhtiyar

I had a great learning experience at Orbit Training Center. The trainers are knowledgeable, supportive, and always ready to help. The clear and practical teaching methods really helped improve my skills and confidence. I highly recommend Orbit Training Center to anyone looking to learn AutoCAD, Revit, and other professional skills.

Sana Zahid -

I recently completed the online Digital Marketing course with Orbit Training Center, and it was a great experience! The lessons were clear, practical, and easy to follow. The trainers were knowledgeable and supportive throughout the course. I've learned a lot that I can apply to my work here in Belgium. Highly recommend Orbit Training Center to anyone looking to improve their digital marketing skills!

Cleavon Henderson

Orbit Training Center offers outstanding CAD classes that are easy to understand, even as a first-year mechanical engineering student. The instructors simplify complex concepts and use practical examples, making the learning process engaging and effective. Whether you're new to CAD or improving your skills, Orbit Training Center provides a supportive and enriching environment. Highly recommended!

Danish Khan

Just finished Primavera P6 training at Orbit Training Center and it was fantastic! The trainer made complex scheduling concepts easy to understand with real-world examples. Got hands-on experience with project planning, resource allocation, and progress tracking. The course was well-structured and I feel confident using Primavera P6 for my projects now. Great value and would definitely recommend to other project managers!

At Orbit Training Center, we offer a diverse range of professional courses designed to equip you with the latest industry skills and knowledge. Our comprehensive programs cover in-demand fields such as Interior Design, Computer Science, Graphic Design, Digital Marketing, Solar Energy, and specialized software training including STAAD Pro, Revit Architecture, Tekla Structures, and more. Each course is crafted by industry experts to provide hands-on learning, real-world applications, and certification preparation.
